Address: IESE Business School, Av. Pearson 21, 08034 Barcelona, Spain

Education

Ph.D. in Accounting	<i>Expected 2027</i>
IESE Business School , Spain	
<i>Advisor</i> : Professor Gaizka Ormazabal	
M.Sc. in Accounting	<i>2020</i>
Xiamen University , China	
Exchange Student, Korea University Business School , South Korea	<i>Feb.–Jul. 2019</i>
B.Sc. in Economics	<i>2015</i>
<i>Major</i> : Finance	
Shanghai Maritime University , China	
<i>Minor</i> : Accounting	<i>2014</i>
Shanghai University of Finance and Economics , China	

Research

Research Interests

Disclosure, Stakeholder Activism, Textual Analysis, AI and Machine Learning, Labor markets.

Job Market Paper

“How Does Public Activism Shape Voluntary Disclosure? Evidence from the Thematic Contents of Conference Calls”, single-authored

Abstract: This paper examines how broad public activism shapes firms’ voluntary disclosure choices in conference calls. Using textual analysis of earnings call transcripts, I study whether public activism changes the thematic content of managerial communication, with a focus on stakeholder salience, public scrutiny, and managers’ attention to non-financial issues.

Award: *The Sue Hrasky Best PhD Paper Prize*

Working Papers

“Do NGO Campaigns Affect Firms’ Labor Markets? Evidence from Employee Reviews, Job Postings, and Worker Flows”, with Igor Kadach

Abstract: This paper examines whether NGO activism affects firms through the labor market. Combining NGO campaign data with employee reviews, job postings, and worker-flow outcomes, the paper studies how external stakeholder pressure shapes employees’ perceptions, firms’ labor demand, and worker mobility.

“Mapping Digital Opacity: Corporate Restrictions on Automated Web Access”, with Long Cheng and Igor Kadach

Abstract: This paper constructs a unique dataset of U.S. firms from 2001 to 2025 to revisit the classic trade-off between information benefits and proprietary costs in the digital era. We examine how firms

restrict automated web access and study what these restrictions reveal about corporate transparency, information access, and strategic disclosure choices.

“Green Banks and the Demand for Green Skills: Evidence from Job Postings”, with Claudio Rizzi, Simon Xu, and Paul Yoo

Abstract: This paper examines the labor-market consequences of green banks in the United States. Using job-posting data, we study whether green finance initiatives affect firms’ labor demand, with a focus on employment decisions, workforce composition, and the demand for green skills.
